

PRITAM LIMBU

COMPUTER ENGINEERING STUDENT | SOFTWARE DEVELOPER

Nepal | pritamlimbu0001@gmail.com | github.com/pritamlimbu0001-ux | pritamlimbu.com.np

PROFESSIONAL SUMMARY

Bachelor of Computer Engineering student with hands-on experience building independent software applications and practical projects. Develops database-driven applications using Laravel, PHP, MySQL, JavaScript, and related technologies. Interested in application development, databases, debugging, and solving practical problems through technology. Seeking an internship, trainee, or junior software development opportunity.

TECHNICAL SKILLS

Programming Languages: PHP, Python, Java, C, C++, JavaScript

Frameworks & Technologies: Laravel, Flutter, Blade, Tailwind CSS

Web Technologies: HTML, CSS

Database: MySQL, CRUD operations, relational database concepts

Development Tools: Git, GitHub, Visual Studio Code, XAMPP, Android Studio

Core Development Skills: Software development, application development, database management, authentication, CRUD operations, debugging, problem solving, version control, application deployment

PROJECT EXPERIENCE

Saptashree Futsal — Online Booking System

Technologies: Laravel, PHP, MySQL, JavaScript, Tailwind CSS | Role: Software Developer | Type: Independent Project

Developed a database-driven futsal booking application focused on venue information, booking workflows, and user and administrative management.

- Implemented user registration and authentication, plus futsal venue information and details.
- Built date-based booking, time-slot selection, booking creation, and booking management workflows.
- Included booking history and a user dashboard backed by database-driven booking records.
- Implemented booking status management and administrative management functionality.
- Developed a responsive user interface.

Personal Portfolio & Project Management System

Technologies: Laravel, PHP, MySQL, Blade, JavaScript | Role: Software Developer | Type: Independent Project

Developed a database-driven personal portfolio and administration system for managing portfolio content and contact information.

- Implemented admin authentication and profile, project, and skills management.
- Added social-link management, resume/CV management, and contact message management.
- Implemented file and image handling for portfolio content.
- Used database-driven content and deployed the application.

EDUCATION

Bachelor of Computer Engineering

Madan Bhandari Memorial College of Engineering · Pokhara University, Nepal · Status: In Progress

Computer Engineering — Technical Education

Saraswati Secondary School, Nepal · Grades 9–12

Technical education background with exposure to programming, computer systems, software development, and information technology.

PRACTICAL SOFTWARE DEVELOPMENT

- Developing software applications independently and building database-driven applications using Laravel, PHP, and MySQL.
- Implementing application logic, authentication, and CRUD workflows with relational databases.
- Debugging and troubleshooting applications; using Git and GitHub for version control.
- Deploying applications and learning and applying new technologies through practical projects.

LANGUAGES

Nepali: Native | English: Working Proficiency | Hindi: Conversational | Korean: Conversational

PROFESSIONAL STRENGTHS

Problem solving · Logical thinking · Debugging & troubleshooting · Software development · Database management · Independent learning · Technical research · Version control · Adaptability · Continuous learning

CAREER OBJECTIVE

To apply Computer Engineering knowledge to real-world software projects, contribute to a professional development team, gain practical industry experience, strengthen software engineering practices, and continue developing technical and problem-solving skills.
